Summary

This document describes the design and implementation of the Stakeholders' Database (SDB), which is one of the instruments in conducting and implementing the EQVEGAN project. The SDB includes diverse stakeholders of the vegan food industry (VFI): VFI enterprises, food industry associations, VFI related education and training providers, VFI related public agencies etc. from 11 countries involved in the project (Portugal, Spain, France, Malta, Croatia, Austria, Poland, Finland, Estonia, Greece and Turkey). The SDB is available at the Food Skills platform of the project <https://www.food-skills.eu/stakeholder/database>.

1. Introduction

The aim of the EQVEGAN project is to support the fast-changing vegan food industry (VFI) by upscaling the enterprises' staff competences. The project proposal formulates the purpose of the stakeholders' database (SDB) as follows: "The SDB per country will be built and incorporated in the project platform. Entries included in the SDB are mainly vegan food industry (VFI) enterprises and VFI related education and training providers (ETPs). The database will contain information on stakeholder's activities, interest for collaboration, language and contacts, complying with the General Data Protection Regulation. At least 25 entries per population size of 10 million inhabitants will be gathered."

The WP1 of the project is aiming at providing necessary input for the WPs 2-4. This includes four tasks (see Figure 1), whereas two of them (WP1.1 and WP1.3) are more technical. In reviewing occupational profiles of the main VFI occupations according to ESCO (European multilingual classification of Skills, Competences and Occupations <https://ec.europa.eu/esco/portal/howtouse/21da6a9a-02d1-4533-8057-dea0a824a17a> (WP1.2) the main contributors to the will be the representatives of VFI industries and the qualifications agencies. In the preparation work package, the first step is to identify the stakeholders of the EQVEGAN and define the professional's profiles that will constitute the objectives to the design of training. These results will be immediately available in a portal. Additionally, guidelines for the design of staff trainings will be produced (WP1.4).

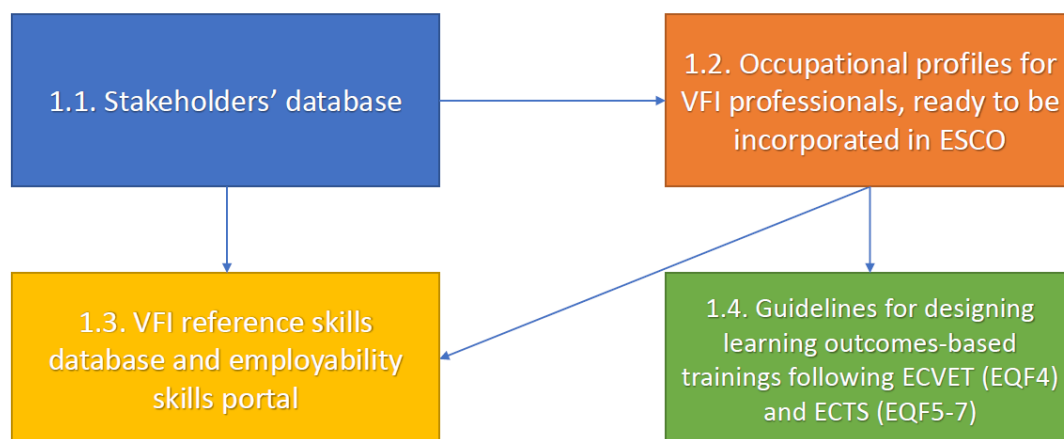

Figure 1. The structure of WP1

2. The Stakeholders' Database

The SDB was developed in three phases:

- 1) Designing the SDB scheme.
- 2) Designing the stakeholders' engagement scheme.
- 3) Conducting the first round of stakeholders' engagement.

2.1. Designing the SDB scheme

After discussions with the project partners involved in WP1, the following list of data fields per stakeholder has been agreed:

- Country,
 - Name of the organisation in English,
 - Name of the organisation in national language,
 - Contact person's name,
 - Contact person's email address,
 - Address of the organisation.
 - Type of organisation (association, federation, enterprise, public body, research institute, education and training provider (higher education institution, VET institution, other)),
 - Short description of the organization (200 characters),
 - Organisation website address,
 - Organisation NACE code
- <https://ec.europa.eu/eurostat/documents/3859598/5902521/KS-RA-07-015-EN.PDF> (not mandatory).

In compliance with EU GDPR rules, only some fields not containing delicate personal data are publicly displayed in the SDB, the others remaining confidential and only used for project purposes.

2.2. Designing the stakeholders' engagement scheme

The stakeholders' engagement scheme was developed having in mind, that the SDB is a collection of country SDBs. Therefore, we first developed the EQVEGAN Stakeholder Declaration of Interest form (see Annex 1). By filling this form an organisation declares the interest to follow the results of the project, it will be given access to the developed training content and participate for free in trainings, and complying that the non-delicate personal data will be published in the Project Platform.

Additionally, stemming from the indicator provided in the project proposal - 25 entries per population size of 10 million inhabitants, the following target numbers were set for the partner countries (see Table 1).

Table 1. Expected minimum number of entries in the SDB

Country	Population (UN, 2019)	Minimum number of entries in the SDB	Expected minimum number of entries in the SDB
Austria	8.9	22	22
Croatia	4.1	10	10
Estonia	1.3	3	4
Finland	5.5	14	14
France	67.1	168	168
Greece	10.7	27	27
Malta	0.5	1	2
Poland	38.0	95	95
Portugal	10.3	26	26
Spain	47.1	118	118
Turkey	83.4	209	209

An invitation to the project partners was compiled explaining the logic of stakeholders' engagement scheme (see Annex 2).

2.3. Conducting the first round of stakeholders' engagement

The task leader circulated an invitation (see Annex 2) among the project partners. Each partner decided the mode how to approach potential stakeholders to guarantee balanced representation of different groups (VFI enterprises, education and training providers etc.). Annex 3 illustrates how TGDF as the task leader performed this.

As a result of WP1.3 the SDB is available at the Food Skills platform of the project <https://www.food-skills.eu/stakeholder/database>. The SDB contains 85 entries, incl. 56 VFI enterprises, 4 VET institutions, 7 higher education institutions, 1 research institute, 11 food associations/federations, 6 public bodies. The number of organisations per partner country differs substantially from the expectations described in Table 1 (see Table 2).

During the first internal evaluation a question was raised whether the population based target is realistic. It has been suggested, that the target could be based on the factual number of VFI enterprises in the countries.

Table 2. The number of entries in the SDB per country after the first round of stakeholders' engagement

Country	Expected minimum number of entries in the SDB	Number of entries in the SDB after the first round of stakeholders' engagement
Austria	22	3
Croatia	10	8
Estonia	4	3
Finland	14	2
France	168	10
Greece	27	9
Malta	2	0
Poland	95	22
Portugal	26	8
Spain	118	11
Turkey	209	9

3. Conclusions

As a result of WP1.1 the SDB was designed, implemented in the Food Skills portal (in the framework of WP1.3) and populated with diverse VFI stakeholders from 11 partner countries of the EQVEGAN project. The SDB will be further filled with additional stakeholders during the forthcoming trainings (WP4) and dissemination activities (WP6) using the Food Skills portal.

Annex 1. Invitation letter to the project partners

Dear Partner,

First of all, thank you for your valuable contribution to the questionnaire. The questionnaire has now been implemented in Google Docs: https://docs.google.com/forms/d/e/1FAIpQLSfw_4HPt4CGk1RwWXzBEjLHNz_UUo_OjmocAnS3Df6gwpma0Zw/viewform?usp=sf_link.

We kindly request you to send the letter attached to the potential stakeholders (mainly VFI enterprises and VFI related education and training providers) of our project in your country. The letter provides brief background information about the EQVEGAN and the stakeholder database (SDB), and the role of stakeholders in the project.

You will find the number of stakeholders expected to be included into the stakeholder database from your country in the table below.

Country	Population (UN, 2019)	Minimum number of entries in the SDB	Expected minimum number of entries in the SDB
Austria	8.9	22	22
Croatia	4.1	10	10
Estonia	1.3	3	4
Finland	5.5	14	14
France	67.1	168	168
Greece	10.7	27	27
Malta	0.5	1	2
Poland	38.0	95	95
Portugal	10.3	26	26
Spain	47.1	118	118
Turkey	83.4	209	209

Please forward the letter to potential stakeholders from your country inviting them to fill in the questionnaire **until 29 January 2021**. Please feel free to translate the letter into your national language if necessary.

Thanking you in advance,

NEBAHAT CAKAR

On behalf of the TGDF, task 1.1 leader, TURKEY

Annex 2. Invitation letter to potential stakeholders

Dear Sir/Madam,

The food industry is changing rapidly, particularly because of shift in the consumer toward plant-based diets, leading to an increased share of production by the vegan food industry (VFI). **We invite your organisation to participate in the EU Erasmus+ project EQVEGAN as a stakeholder.** The project is aiming at promoting the development of VFI. The food industry in general is subject to demanding sustainability requirements, that together with digitalization and automation trends, are quickly changing the occupational profiles of its employees. Therefore, innovative trainings are needed to support the quick change towards the VFI also subject to Industry4.0.

The project is focussing on occupational profiles of “Fruit, vegetable and related preserver” (EQF4, ISCO-08 code, ESCO 7514), “Food Production Operator” (EQF 4), “Food technician” (EQF 5), and Food Technologist/Engineer (EQF 6 and 7). The first work package of the project will review the VFI specific occupational profiles included in the ESCO (European multilingual classification of Skills, Competences and Occupations <https://ec.europa.eu/esco/portal/howtouse/21da6a9a-02d1-4533-8057-dea0a824a17a>). We shall define the profiles after consultation of relevant **stakeholders – mainly VFI enterprises and VFI related education and training providers.** The stakeholder community will be involved in identifying VFI specific skills, validating the occupational profiles and disseminating the project deliverables.

A Stakeholders’ Database will be built and incorporated in the Project Platform. Employability skills for the VFI will also be made available in the Skills Portal and further linked to courses and certification developed in other work packages. We shall also design and offer innovative trainings to VFI professionals and students from EQF levels 4 to 7, in seven languages (English, Croatian, Finnish, French, Polish, Portuguese and Turkish). Members of your organization will also have an opportunity to participate.

A stakeholders’ database per country will be build and incorporated in the project platform. The database will contain information about your organization, its activities, interest for collaboration, language and contacts, complying with the EU General Data Protection Regulation.

If your organisation is interested in participating in the EQVEGAN project as a stakeholder, **please fill in the declaration of interest until 17 February 2022** by inserting your data in the following link: https://docs.google.com/forms/d/1UaiAigcNQjkre70gK_2r8Rx4XANC_pbZ2c2SYOZoBgE/edit?usp=forms_home&ths=true

We are looking forward to cooperate with you.

Thank you,

/Name of the EQVEGAN partner representative and the name of project partner organisation/

Annex 3. Example of stakeholders' engagement by TGDF

TGDF prepared the following brochure distributed among 136 potential stakeholders (see Table 3).
