Summary

Communication and dissemination activities are important to ensure that awareness of the project, and of the work being undertaken, exists in as many relevant and interested stakeholders as possible. EQVEGAN Deliverable 6.4 provides a summary on the organization and participation in events for project communication and dissemination. The first edition of the report was due by M9 and was updated each 9 months (M18, M27, M36). This fourth edition covers the activities carried out during M28-M36 (Mar 2023- Nov 2023).

Foreword **I**

Summary **II**

1. Introduction **4**

2. Organization of project CD events **4**

3. Participation in events for project dissemination **7**

4. Final remarks **12**

1. Introduction

EQVEGAN Deliverable 6.4 provides a summary on the communication and dissemination (CD) events organized by the project, and on the participation of EQVEGAN partners in other events for project dissemination. The first edition of the report was due by M9 and has been updated each 9 months (M18, M27, M36). This fourth edition covers the activities carried out during M28-M36 (March 2023-November 2023).

2. Organization of project CD events

During M28-M36 (March 23-November 23) EQVEGAN organised 3 events to disseminate the project outcomes.

- The first event was the **EQVEGAN workshop held at the ISEKI-Food Conference**, on 4th July 2023. The event was organised by IFA, along with the partners IPC, FFTB, SEAMK,PULS, EQV and MCAST. The main objective of this 2 hours workshop was to disseminate the project trainings and the modules on green skills, plant-based food processing, digitalisation/automation and soft skills. Other important project outcomes were disseminated to the audience, such as the EQVEGAN certification and the guidelines for work-based learning recognition.

Figure 1. EQVEGAN pre-conference workshop organised at the ISEKI-Food Conference 2023.

The agenda was the following:

- Opening (Rui Costa, IPC)
- EQVEGAN objectives and activities (Rui Costa, IPC)
- Plant based processing (Zbigniew Krejpcio/ Dorota Piasecka-Kwiatkowska, PULS)

- Sustainability (Sanja Vidaček, FFTB)
- Soft skills (Susana Gonçalves, IPC)
- Digitalization & Automation (Markus Ojala, SeAMK)
- EQVEGAN certification (Olav Aarna, EQA)
- Guidelines for WBL recognition (Jodie Bonnici, MCAST)
- Closing (Rui Costa, IPC)

15 participants from different countries attended the webinar, all from higher education institutions. A [photo gallery](#) and a [news](#) on the event can be found on the project website.

- The second event was “**Challenges & Opportunities for the Plant-based Food Industry: EQVEGAN Project**”, held on 4th October 2023. The event organized jointly by ACTAE and IFA, took place at the Faculty of Pharmacy (University of Basque Country in Vitoria-Gasteiz, Spain), was also broadcasted online, and had the participation of students (49), food professionals (9) and higher education institutions (43) from 17 nationalities.

Figure 2. Hybrid event organised by ACTAE and IFA: Challenges & Opportunities for the Plant-based Food Industry: EQVEGAN Project

Dr. Mirari Ayerbe, Dean of Faculty of Pharmacy (UPV/EHU) opened the session, greeting the invited speakers and participants. Carmen de Vega (ACTAE) and Christoph Knöbl (IFA) then presented their institutions, focusing on their work, competences, involvement in projects and main objectives.

Two EQVEGAN presentations followed: Luis Mayor (IFA) gave a general presentation of the project, including activities like the developed trainings, the food professional certification scheme, and the development of the [food skills portal](#). Carmen de Vega described the endeavours to revise the [ESCO](#) Food technologist job profile, “Food technologist: updating the occupational profile with plant-based, green & digital skills”.

Finally, Aitzpea Armendariz (IPARLAT) presented the successful history of [Natur All](#), a Spanish plant-based food company), showcasing the commercial and technical transition from dairy

to plant-based drinks and the development of the brand with a wide range of new vegan products.

At the end, there was a question-and-answer session which led to a fruitful discussion about the skills needs in the food industry to comply with a plant-based driven food market and the opportunities found by the Spanish dairy industry to enter into the plant-based drinks market.

The event lasted for 1H15 and the recording is available on [youtube](#). [Image gallery](#) and [news](#) available on the project website. It was included in the [European year of skills](#).

- The third event was organised by IPC and ETP Sicó, EQVEGAN partners, along with the [Confederation of Portuguese Farmers](#)(CONFAGRI), with the aim of disseminating at national level the EQVEGAN project, the [I-RESTART](#) project and the [Pact for Skills](#) initiative. The organizers expected that in this way, covering several relevant projects, the event would attract more attendees.

The event was held in at the CONFAGRI facilities in Lisbon (Portugal), on 16 November 2023 and had the participation of 26 participants from food industry (4), public administration (3), and training institutions (19).

Figure 3. Event “Accelerate and adjust training in the agri-food sector”, held in Lisbon on 16 November 2023.

With the title “**Accelerate and adjust training in the agrifood sector**”, the meeting started with a presentation from [CEDEFOP](#) (recorded presentation) on its skills foresight exercise on the agri-food sector. This presentation fed with ideas the round table moderated by CONFAGRI, with a representative from the Ministry of Agriculture, a representative of them [National Agency for Qualification and Professional Education](#) (ANQEP), the Director of the [Federation of Portuguese Agro-Food Industries](#) (FIPA) and the EQVEGAN project coordinator Rui Costa. It was closed with a presentation of I-RESTART, the Pact for Skills, and the EQVEGAN project.

The meeting finished with the tasting of vegan products offered by ETP Sicó, prepared and served by students from this institution.

[News](#) and [image gallery](#) of the event available on the project website.

3. Participation in events for project dissemination

During this period EQVEGAN has been disseminated in 33 events (Table 1), both at national (17) international (16) level. At this final stage it has been possible to disseminate some project outcomes such as the training modules, the training materials, the professional certification scheme, the guidelines for work-based learning recognition, the project website and the food skills portal, and also the general presentation of the project. Dissemination activities had from very specific audience (as example the project dissemination done by EQA for the Estonian Sector Skill Council members 11/04/23) till wider audience in conferences (ISEKI-Food conference, FOOD 4 FUTURE summit, "Farm to Fork" congress) where target groups were mainly food companies, education providers and researchers. In total reached audience estimates are Food Professionals (450), Food Industry (2000), Higher Education (600), VET providers (500), Scientific Community (1600), Students (70000), Policy Makers (100) and General Public (5500).

4. Final remarks

At the last stage of the project (March 23-November 23) EQVEGAN has organised 3 events and has participated in 33 events (national and international) to disseminate the project results, with a focus on the project trainings and related training materials. Some of these events were included in the European Year of Skills, which promoted the impact of these dissemination activities at international level.

Other events not reported in this document were the training activities, which indirectly disseminated the project outcomes to students.
